The world's simplest RFID tracking solution.

itemit with RFID

itemit is an off-the-shelf RFID solution that automates your asset tracking, so you always know where business critical assets are with no need for manual updates.

Urologie | Salles 1 à 10

The problem.

You are unable to keep track of business critical assets.

Chaos

- You do not know where your assets are
- You are dreading your audit

Inefficiency

- You cannot find the assets you need
- Projects and customers are impacted

Waste

- You're forced to write off lost assets
- You're losing time searching for assets
- You're wasting money buying duplicates

Forget everything you know about RFID solutions.
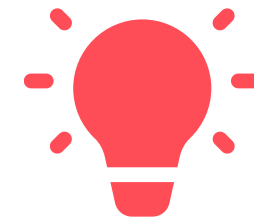

Our solution.

itemit with RFID.

Ridiculously Fast Set Up

Forget projects taking months. With itemit you can be set up within **1 week**.

Incredibly Simple to Use

Choose uncomplicated but advanced **RFID tracking**. Accessible to all.

Built by RFID Experts

We have **25+ years** expertise delivering rapid ROI with incredible RFID solutions.
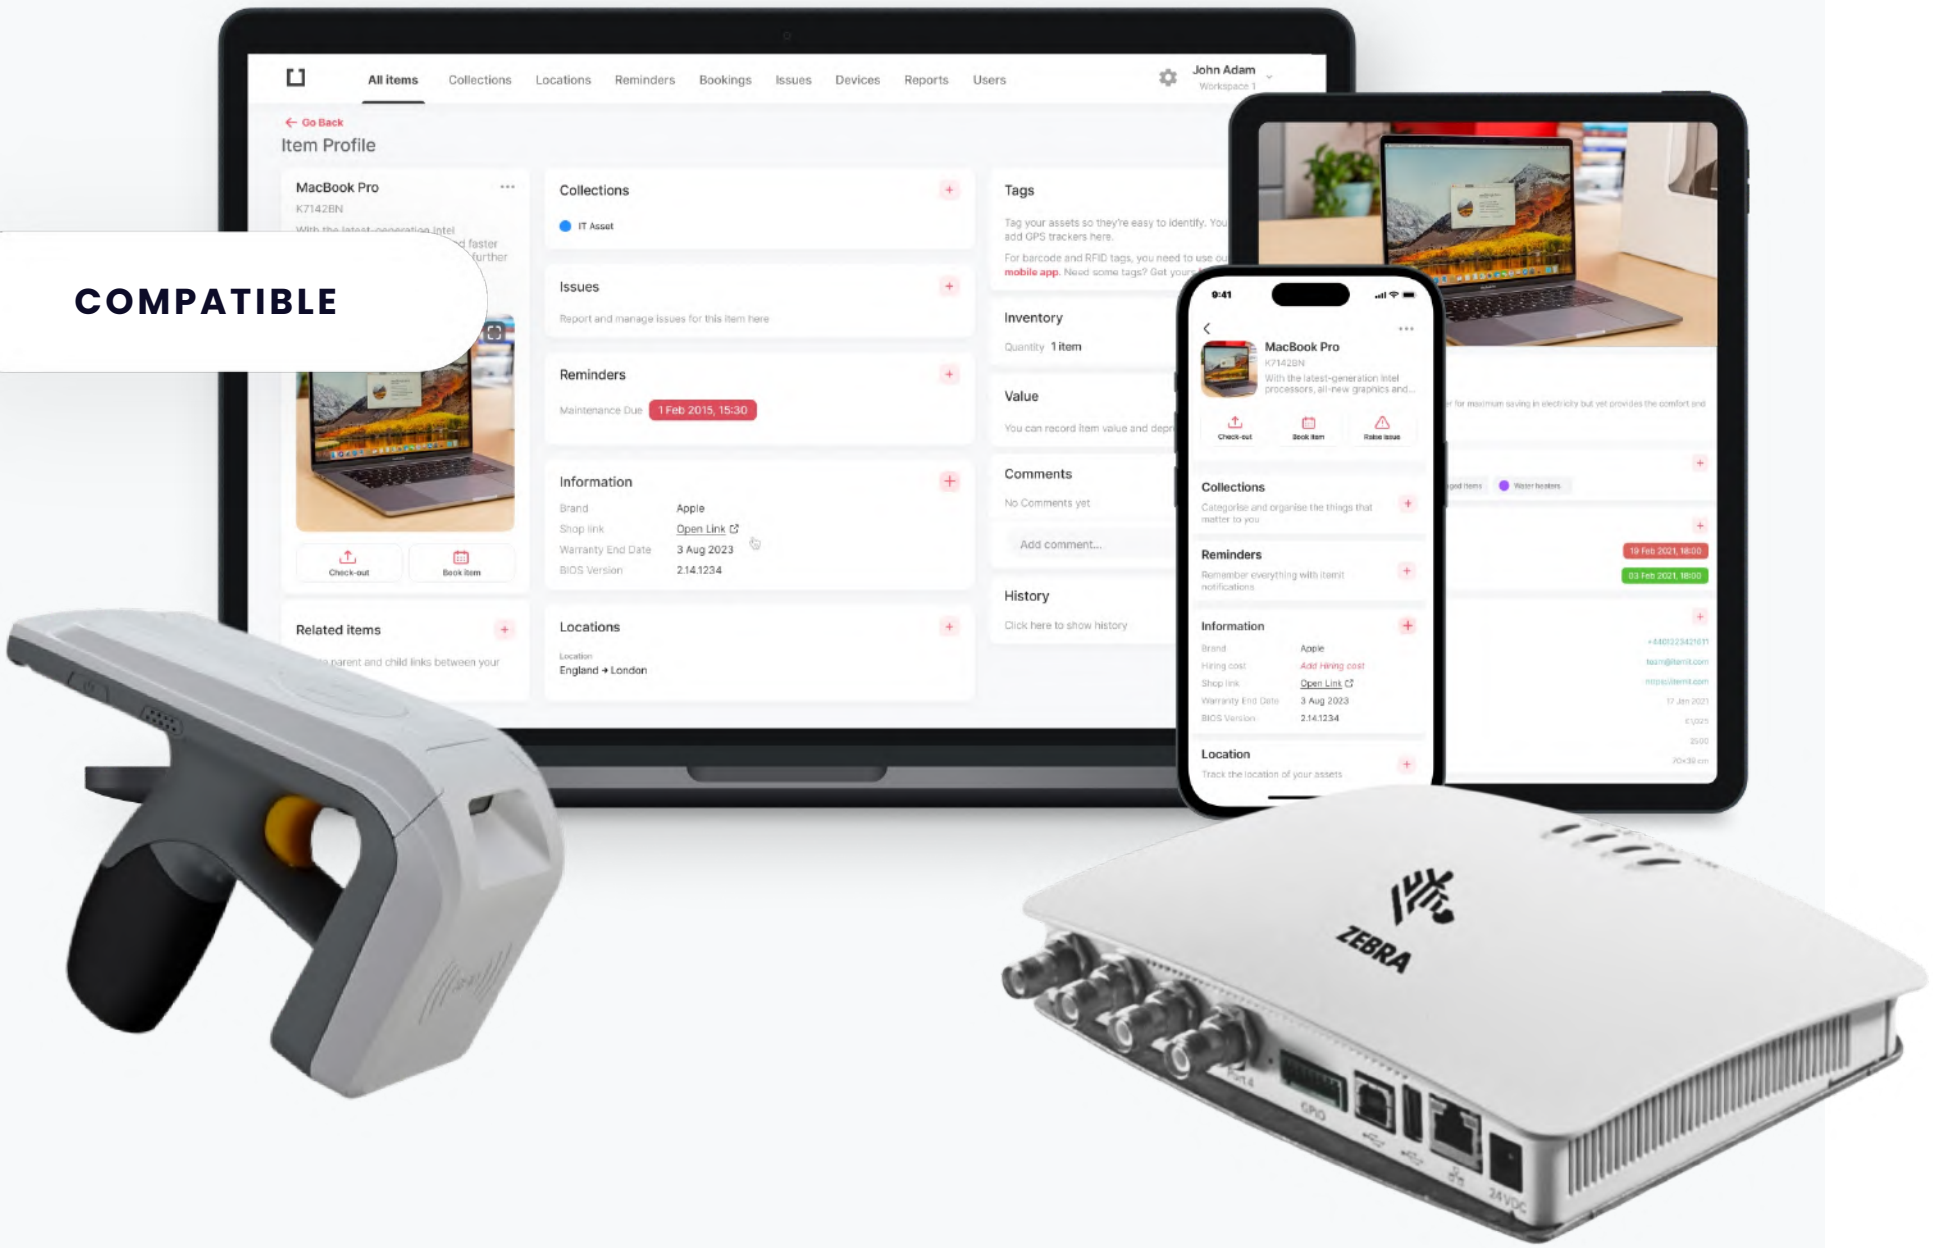

Automated asset tracking. Made simple.

itemit gives you a simple, low-cost way to track and manage all of your business critical assets so you can focus on delivering your mission.

COMPATIBLE

# Plug and play. Reliable hardware bundles.

We've done the hard work of selecting the best hardware and integrating with it so you can simply power up and go. Choose handheld or fixed RFID readers. RFID reader bundles supplied.

Zero headaches.
Unlimited scalability.

A solution that grows as you grow. Uniquely, itemit allows you to track assets using QR codes, barcodes, GPS trackers and RFID. Future-proof your asset tracking with one solution that can be used company-wide.
